We celebrated 70 years of marriage and memories!
We love you, Mom and Dad!

Dear Cattle Men and Women:

Welcome to our 23rd Annual Genetics With Vision Bull and Female Sale and our 42nd year of selling breeding livestock! We are thrilled about this year's offering!

As we look back on the year 2020, we learned a lot about who/what is considered "essential" in our culture. Our country and our world has changed, hopefully, for the better and has a renewed appreciation for agricultural producers and how valuable they are to our country. The pandemic frustrated almost everyone's work but, happily for us, it changed our son Justis' work so much, he decided to join us full time in December! How awesome is that?!

We are grateful for an optimal growing season and harvest in 2020. After several years of tough harvest conditions, we were able to get all of our crops off and the tillage completed before freeze up. With commodity prices and cattle prices trending upward, we have a sense of optimism for 2021.

We are really excited to bring you the first calves out of our new herd sire, LCDR Impact 134F. They. Are. Special. The Impact calves are all we hoped they would be. Our black program needed more performance and wow, did we see a difference! We calved out close to 100 spring cows and another 19 in the 2020 fall group that were bred to Impact. We did not assist the birth of a single calf. The calves had tons of vigor, nursed aggressively and exploded in growth. They have a super attractive phenotype, are loaded with performance without sacrificing carcass quality and possess a great disposition. We couldn't be more pleased. We think you will really like them.

Our goal continues to be "Performance and Peace of Mind". We continue to stay disciplined in our breeding decisions to apply science and technology to the art of livestock production. We utilize genomic enhanced EPD's and parent verify the sale offering. Additionally this year we have added Top Genomics DNA evaluation for a deeper dive into the genomics of the bulls. Please see page 37 for an explanation of this new technology.

It is important that our customers feel comfortable participating in our production sale. We want to highlight that we have many sale day bidding options. One of the advantages of an online/video auction is the availability of sale day bidding options. If you are unable to attend in person, absentee bids can be placed with one of our sale contacts or sale staff listed or bid online through DVAuction. Feel free to call or email if you have any questions or concerns.

As always, you are invited to come and view the cattle and our operation prior to sale day. We thank you for your past support and your friendship. We know an investment in genetics is an important decision and we do not take it lightly. Please let us know if there is anything we can do to help you in your selection process.

RYDEEN FARMS 23RD ANNUAL PRODUCTION SALE

PERFORMANCE + PEACE OF MIND = GENETICS WITH VISION

SATURDAY, FEBRUARY 13, 2021 | CLEARBROOK, MN | 2:00 PM CST

65 BLACK & RED YEARLING BULLS | 15 AGED BULLS [18 MONTHS+] | 25 BRED & 16 OPEN FEMALES

Terms and Conditions: This sale is conducted under the standard terms and conditions adopted by the American Simmental Association. If you have any questions, please contact us.

Registration Papers: Registration papers will be transferred on all animals. Please inform the clerk of your ASA number.

Feeding Arrangements: If you are unable to take your bull home on sale day, we will feed them for free until April 1, 2021. The bulls we feed will be put in with our bulls and treated the same. Successful buyers are responsible for animals purchased sale day and we are not responsible if an animal is injured after purchase. We encourage you to purchase mortality insurance. We will be semen testing bulls left here as able based on schedules. If you are interested in having your animal tested, please let us know.

Trucking: We will assist buyers in coordinating and making the most economical hauling arrangements.

Herd Health: We have completed 8 years of whole herd Johnes testing and all dams of sale cattle tested negative in 2020.

Spring 2020 born bulls were vaccinated at birth with Vision 8, InForce3, and given MultiMin. They were vaccinated in the spring with Vista Once, and UltraBac 8. Prior to weaning they were given Vista Once, UltraBac 8 and MultiMin. At weaning they were given UltraBac 8 and InForce 3. In November they were given Once subq., Valbazen and poured with Clean Up 2. They were repoured in December with Clean Up 2.

Aged bulls were vaccinated in the early spring of 2020 with Vista Once, UltraBac 8, given MultiMin and poured with Ivermectin. In the fall of 2020, they were vaccinated with Vista Once, InForce3, UltraBac 8, MultiMin, Valbazen, and poured with Clean Up2. They were repoured in January with Ivermectin. All aged bulls have passed a breeding soundness exam and have a valid semen test.

Bred heifers were vaccinated with UltraBac 8 and ViraShield 6L5, given MultiMin, and LongRange prior to breeding. The bred heifers were ultrasounded on 7/21/2020 and 7/30/2020 and 11/18/2020 for pregnancy. In the fall of 2020 they were vaccinated with UltraBac 8, In Force 3, ScourBoss 9, Valbazen, and poured with Clean Up 2. Bred females are Bangs vaccinated and have had two doses of ScourBoss.

Open heifers were vaccinated with Vision 8, Inforce 3, and MultiMin. They were vaccinated in the spring with Vista Once, and UltraBac 8. Prior to weaning they were given Vista Once, UltraBac8, and MultiMin. At weaning they were given Vista Once, InForce3, and poured with Clean Up 2. They are Bangs vaccinated.

Additional information: Ultrasound data will be available the day of the sale.

Semen Rights: We will retain 1/3 semen interest on all bulls sold in the sale unless specifically noted.

Livestock Insurance: Lindfors Insurance Agency will be available sale day, 218-435-6585.

Announcements: Announcements made sale day and from the auction block during the sale, take precedence over printed material in the catalog or other printed material associated with the sale. Anyone attending this sale attends at his or her own risk; we are not responsible for accidents, damages or stolen items.

Catalog designed by

LCDR IMPACT 134F

Homozygous Polled | Homozygous Black

Our quest for a purebred, homo black, homo polled, performance bull with a great phenotype and excellent carcass quality led us to the Lazy C Diamond ranch in 2019. LCDR Impact 134F has jumped through every hoop with ease. From freezing quality semen as a calf, to passing each appraisal from every scrutinizing breeder, to walking the pastures and servicing cows for two seasons, this fellow hasn't missed a beat. When his first calves hit the ground, we could see there was a difference. The cows (97) calved without assistance, the calves had vigor and explosive growth. His sire crop is extremely consistent from end to end. He has exceeded our expectations and we think these sons and daughters are truly the best we have ever raised. Today, LCDR Impact 134F holds the top spot for weaning weight (131.6) and yearling weight (215.9) while still maintaining the top 4% for marbling and top 1% for REA in the entire Simmental breed. We named him Impact for a reason, he's made an Impact on our herd and we believe he will make an Impact on yours as well.

Lot 4

RFS MISS Z73 - Granddam of Lots 1-4

IMPACT x E42 FLUSHMATES LOTS 1 - 4

E42 was chosen to be a donor because she is our favorite Constitution female because her Tanker dam, Z73, has stood the test of time here at Rydeen Farms. While Z73 doesn't have the numbers some donors do, we love our Tanker females. Functional, powerful, docile—the Tanker females get it done. The calves weigh up at the sale barn and/or make excellent replacement females.

F64 DAM OF LOTS 5-6

We chose F64, an All Around daughter, to be a donor for her impeccable pedigree, perfect udder and moderate phenotype. Her dam, a Top Grade female, has superb maternal traits. The sons of F64 carry the red gene so could go on to produce the next great, powerful RED herd sire.

YEARLING BULLS

Lot 5

Lot 6

Lot 7

RFS MISS Z73 DAM OF LOT 7

This Tanker daughter has been a superstar her whole life. Year after year, she produces a power calf. Because her track record was so good, she deserved to go into the donor pen where she produced dozens of embryos. Her maternal pedigree is stacked-- it includes RFS E28 and RFS U95, foundational females of our herd.

- Standout calf all summer
- Owned by our terrific employee, Tyler Haman
- Dam has raised 3 calves in 360 day interval
- Eye catching phenotype

Ultrasound information will be available sale day and online at www.rydeenfarms.com

KRJ HZN DIRECT IMPACT F805

Homozygous Polled | Heterozygous Black

Direct Impact was our sire of choice to use on our black heifers for low birth weight and calving ease. With an EPD profile that is hard to beat, great calving ease with performance, we chose to use him again in 2020.

All Aboard is a performance red bull that is very complete. Two of his sons, RFS Force and KBHR Kingsman are sons used in our program. The RFS Force F35 was the high selling bull in our 2019 Vision Sale to Doll Simmentals. KBHR Kingsman was a high selling bull we purchased from Keller's Broken Heart Ranch in 2018.

THANK YOU!

We are sincerely grateful for the amazing people we have met along the way. These relationships mean so much to us. We love hearing how the animals perform in your herd! We are also extremely blessed with family and friends that come at a moment's notice to help out. Lastly, we feel we have about the best teammates around. Tyler, Gene and the rest of the sale crew can't be beat! Thank you for all you do day after day, year after year!

UNDERSTANDING EPDS

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed:

- Calving Ease (CE):** Percent of unassisted births when used on heifers.
- Birth Weight (BW):** Pounds of birth weight.
- Weaning Weight (WW):** Pounds of weaning weight.
- Yearling Weight (YW):** Pounds of yearling weight.
- Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.
- Milk (MLK):** Pounds of weaning weight due to milk.
- Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.
- Stayability (STAY):** Percent of daughters remaining in the cowherd at six years of age.
- Docility (DOC):** Percent of offspring receiving a disposition score of 1 (docile).
- Carcass Weight (CW):** Pounds of carcass weight at 475 days.
- Yield Grade (YG):** Carcass yield grade score at 475 days.
- Marbling (Marb):** Carcass marbling score at 475 days.
- Back Fat (BF):** Inches of carcass back fat at 475 days.
- Ribeye Area (REA):** Square inches of carcass ribeye at 475 days.
- Warner-Bratzler Shear Force (WBSF):** Pounds of force required to shear a rib-eye steak.
- All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

- Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)
- \$ Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:
- All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
- Terminal Index (TI):** Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.
- Using API and TI:** First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr.=\$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

Pick of the Impact X E46 Daughters LOTS 108A-108C

Here's your opportunity to purchase an exclusive Impact female. Our E46 donor is an Allegiance daughter with tons of eye appeal that goes back to one of the great cows, Kayla, from Kenner Simmentals.

Watch & bid online for FREE at

DVAuction
Broadcasting Real-Time Auctions

Can't make the sale? Bid from home with DV Auction's "real-time" internet bidding service!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

BETTER. STRONGER. FASTER.

RightMate

powered by TOP GENOMICS

BETTER. Revolutionary results. Maximum benefit from every breeding decision.

STRONGER. Harness the full power of genomic technology.

FASTER. Drive genetic improvement and promote consistency at a rate never before possible.

RightChoice

powered by TOP GENOMICS

BETTER. Simplified bull buying with maximum profit impact.

STRONGER. Confidently and securely match genetic choices with your needs.

FASTER. Makes cutting edge genomic technology quick and easy to use.

"A year of seedstock herd validation is proving multiple generations of genetic progress in a single mating cycle AND substantially reduced calf crop variation. Give us a call today for more details."

- Marty Ropp, Allied Genetic Resources

Confidently choose the logoed group that matches your needs, then just pick the bulls you like:

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase.

These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to other evaluation programs.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically

to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. The reduced risk that comes with this genomic certification will simply make your decisions easier and your

heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

You invested in genomics. Take the technology to the next level.

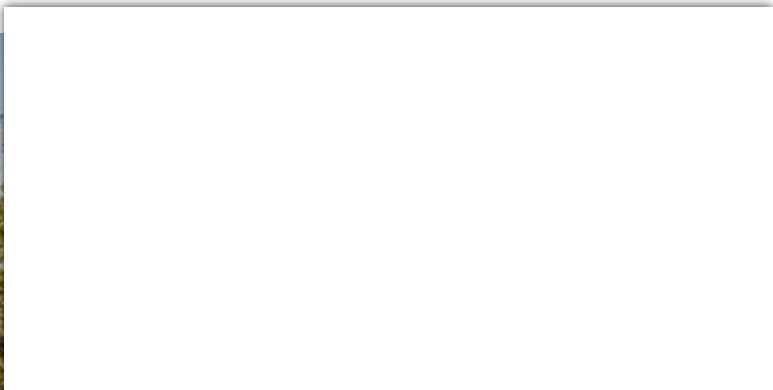

RightMate and RightChoice scoring is available to ALL breeders.
