

RYDEEN FARMS'
26TH ANNUAL PRODUCTION SALE

PERFORMANCE + PEACE OF MIND =
GENETICS WITH VISION

SATURDAY, FEBRUARY 10, 2024 | CLEARBROOK, MN | 2:00 PM CST

SIMMENTAL & SIMANGUS BULLS & FEMALES

62 Black & Red Yearling Bulls / 19 Aged Bulls [18 months] / 43 Bred & 17 Open Females

Rydeen Farms

SINCE 1897

Polled Red & Black Simmental Cattle

Welcome to our 26th Annual Genetics with Vision Bull and Female sale and our 45th year of selling breeding livestock! Thank you for your interest!

We had a beautiful summer with just enough moisture and sunshine. The calves were heavy at weaning due to the optimal conditions and the addition of another pasture. We welcomed our first grandchild, Inga into the family in October. Our hearts are full!

In putting the catalog together this year, we realized that this is the third time we have tattooed the calves with the letter "L"! For some reason, that hit us in the funny bone and we have been chuckling about that ever since! The first time we used "L" was in 1979-hard to believe. How our breed and technology have changed! We continue to use the technology and science that is available and participated in the Calf Crop Genomics program and submitted DNA on all of our 2023 born calves to improve EPD accuracy and parent verify every animal in our herd. Additionally, we continue to use the Top Genomics DNA evaluation tool, Right Mate and Right Choice to go even deeper into each animal's genomics. Please see page 4, for an explanation of this new technology. We feel it is a useful tool and wish it had been available in 1979!

Every year we work to create a better group of bulls and females and this year we are especially happy with how the group has come together. Our motto, "Performance and Peace of Mind" impacts every breeding decision. We believe in an expanded definition of performance and believe performance in the pasture or the feed lot is paramount. We continue to strive for double digit calving ease without sacrificing pounds or carcass quality. The groups we have put together this year exemplify these goals. The black side is very strong and highlighted by a large group of KBHR Global sired bulls, CCR Cochise sired bulls, Hook's Eagle sired bulls, and the extremely exciting Gibbs Essential X G132 Medora flush mates. Excellent performance with

Above: The Rydeen Family, Paul, Lois, Inga, Claire, Chad and Justis

excellent carcass quality and a sharp phenotype, this is an exceptional group of bulls overall. We think you will really like their type and kind.

Our red program keeps getting better and better. In 2023 we added CLRS Genome 979G to join our elite donor group. Watch for her progeny in 2025! As we mentioned last year, the backbone of the program is now the powerhouse female WS Electra E88. Phenotypically she is breathtaking, and, her genomics are just as good. We flushed her to Rockin H Captivate and we believe you will love the progeny! Double digit calving ease, performance EPD's, excellent carcass traits and economic indexes are just the beginning! These bulls are dark red, smooth made and super attractive.

Most of the black bred females were Al'd to our new herd sire, JC Pontiac D114K, our pick and the high selling bull out of the Great Lakes Beef Connection 2023 sale or KBHR Global J138, our new herd sire. All the black bred females were pasture exposed to TRIF Breakaway 206K or TRIF Gridmaster 207K. The planned matings exhibit phenomenal EPDs with double digit calving ease, tremendous performance combined with API and TI in the top 15%. The red bred heifers were Al bred to RFS Genetic Vision K162 and pasture exposed to the popular ABS sire, GW Copperhead 919G.

Again this year, we are offering several open heifer picks this year. Feminine but powerful, these females have the phenotype and genotype to walk into your donor pen. They are a unique group!

We would love to see you in person on sale day, however, if that is not an option, join us on DVAuction or contact one of our sale representatives. Finally, we thank you for your past support and friendship. We know an investment in genetics is an important decision and we do not take it lightly. Please let us know if there is anything we can do to help you in your selection process. Feel free to stop by the farm before the sale—visitors are always welcome!

Sincerely, The Rydeen Family

RYDEEN FARMS 26TH ANNUAL PRODUCTION SALE

PERFORMANCE + PEACE OF MIND = GENETICS WITH VISION

SATURDAY, FEBRUARY 10, 2024 | CLEARBROOK, MN | 2:00 PM CST

SIMMENTAL & SIMANGUS BULLS & FEMALES

62 BLACK & RED YEARLING BULLS | 19 AGED BULLS [18 MONTHS+] | 43 BRED & 17 OPEN FEMALES

Located ½ mile north of Clearbrook on #5; 3 miles east on #4 and ½ mile south on 199th Ave.

Terms and Conditions: This sale is conducted under the standard terms and conditions adopted by the American Simmental Association. If you have any questions, please contact us.

Registration Papers: Registration papers will be transferred on all animals. Please inform the clerk of your ASA number.

Feeding Arrangements: If you are unable to take your bull home on sale day, we will feed them for free until April 1, 2024. The bulls we feed will be put in with our bulls and treated the same. Successful buyers are responsible for animals purchased sale day and we are not responsible if an animal is injured after purchase. We encourage you to purchase mortality insurance. We will be semen testing bulls left here as able, based on schedules.

Trucking: We will assist buyers in coordinating and making the most economical hauling arrangements.

Herd Health: We have completed 11 years of whole herd John's testing and all dams of sale cattle tested negative in 2023.

Spring 2023 born bulls were vaccinated at birth with Vision 8, Nasalgen Inh, and given MultiMin. They were vaccinated in the spring with Vista Once. Prior to weaning they were given Vista Once, Covexin 8 and MultiMin. At weaning they were given Covexin 8 and Nasalgen. In November they were given Nasalgen, Valbazen and poured with Clean Up 2. They were repoured in January with Ivermectin.

Aged bulls were vaccinated in the spring of 2023 with Vista Once, UltraBac 8. In the fall of 2023, they were vaccinated with UltraBac 8, and Nasalgen in December they received Nasalgen, Valbazen, and poured with Clean Up2. They were repoured in January with Ivermectin. All aged bulls have passed a breeding soundness exam and have a valid semen test.

Bred heifers were vaccinated with UltraBac 8 and ViraShield 6L5, given MultiMin, and LongRange prior to breeding. The bred heifers were ultrasounded on 8/3/2023 and 12/2/2023 for pregnancy. In the fall of 2022 they were vaccinated with UltraBac 8, Nasalgen, ScourBoss 9, Valbazen, and poured with Clean Up 2. Bred females are Bangs vaccinated and have had two doses of ScourBoss.

Open heifers were vaccinated with Vision 8, Nasalgen Inh, and MultiMin. They were vaccinated in the spring with Vista Once. Prior to weaning they were given Vista Once, Vision 8, and MultiMin. At weaning they were given UltraBac 8, Nasalgen and were poured with Clean Up 2. They were repoured in January with Ivermectin. They are Bangs vaccinated.

Semen Rights: We will retain 1/3 semen interest on all bulls sold in the sale unless specifically noted.

Livestock Insurance: Lindfors Insurance Agency will be available sale day, 218-435-6585.

Announcements: Announcements made sale day and from the auction block during the sale, take precedence over printed material in the catalog or other printed material associated with the sale. Anyone attending this sale attends at his or her own risk; we are not responsible for accidents, damages or stolen items.

KBHR Global J138

Homozygous Polled | Homozygous Black

KBHR Global J138 was the high selling bull in KBHR's 2022 sale. His dam is a maternal powerhouse with unmatched udder quality and maternal excellence. We used him heavily in our program siring over 60 calves in 2023. All calves were born unassisted and had tremendous vigor. He is an extremely versatile breeding piece. Purchased to use on heifers, you will find heifer bulls and power bulls sired by Global—a rare feat. Several individual lots have 800+ weaning weights, a testament to Global's special abilities. Our Australian partners, the Bakers toured the pastures this spring and were greatly impressed by Global's docile temperament! Deservedly, this is our largest sire group.

- ET purebred out of our powerful Eagle donor
- Heifer bull with excellent economic indexes

Confidently choose the logoed group that matches your needs, then just pick the bulls you like:

ACCREDITED GENOMIC PLUS - For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED TERMINAL MATE - Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

ACCREDITED CALVING EASE - Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

**Lot 13**

Our Australian partners, the Bakers, came to meet Global and view the herd this past summer.

YEARLING BULLS

Owned by Keller Broken Heart Ranch

Gibbs 9114G Essential X KBHR Medora G132

This set of ET brothers is one of the most anticipated matings of 2024. This unique pedigree is due to the combination of the phenomenal cow, KBHR Medora G132 and the power bull, Gibbs Essential. With EPD profiles at breed leading percentiles, outstanding individual performance, structural correctness and style, we couldn't be more pleased with this mating. There are 5 impressive flush mates to choose from-we cannot say which one is the best. They are the total package of performance with excellent carcass quality. Look for the female flush mates in the open heifer division.

CCR Cochise 414H

Homozygous Polled | Homozygous Black

CCR Cochise 414H was the high selling bull in Cow Camp Ranch's 2022 sale. He is a specimen to behold. Loose made and slick-haired, he roamed the pastures like a stud. We chose him to complement our Impact daughters and wow did that click! Mostly 3/4 bloods, this group of brothers are a rancher's dream and all carry the ATM logo. These out-cross performance bulls are just fun to look at—a beautiful phenotype with style and power. Once again, this bunch exhibits breed leading carcass traits combined with breed leading economic indexes.

Hook's Eagle 6E X RFS Miss J153

Owned by Keller Broken Heart Ranch, Granddam of Lots 25-29

We got five extremely impressive Eagle sons out of our Impact X KBHR E197 donor. We know that there are a lot of Hook's Eagle 6E sons out there but there aren't many with this kind of performance. With TI\$ that sit at 100-112, these purebreds have what it takes to add pounds to your next calf crop. These calves exemplify what we mean by "Performance and Peace of Mind"—they have the performance to increase your profit whether you sell off the pasture or sell on the rail (however you define performance) combined with double digit calving ease. They are special.

RFS Herald H104

Homozygous Polled | Homozygous Black

RFS Herald H104, a Vision Sale highlight in 2021, is the direct son of Impact 134F and has been exclusive to us and Werning Cattle Company. No semen has been sold. His type and pen presence is identical to Impact. Because he is hetero black, we have black baldies and solid red and black Herald progeny in our offering. These cattle are the most physically attractive group and exhibit that "Impact presence" we love to see! Look for RFS Herald progeny in our 18 month Aged Bull Section and in the female offering.

WS Electra E88 x Rockin H Captivate J75

Certainly, the Electra E88 X Gadget sons and daughters were red hot sale highlights for us last year, but we think that this year's Electra E88 progeny will "Captivate" you for sure! This group has 4 flush mates and they command attention when you walk in the pen. Backed by the outstanding Electra E88 cow, they have that added punch in performance ranking them at the top of the class of Captivate bull calves with breed leading EPDs.

• Performance with carcass quality

UNDERSTANDING EPDS

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed:

Calving Ease (CE): Percent of unassisted births when used on heifers.

Birth Weight (BW): Pounds of birth weight.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Stayability (STAY): Percent of daughters remaining in the cowherd at six years of age.

Docility (DOC): Percent of offspring receiving a disposition score of 1 (docile).

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Yield Grade (YG): Carcass yield grade score at 475 days.

Marbling (Marb): Carcass marbling score at 475 days.

Back Fat (BF): Inches of carcass back fat at 475 days.

Ribeye Area (REA): Square inches of carcass ribeye at 475 days.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a rib-eye steak.

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr.=\$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

Selling Pick of the Flush!

Gibbs 9114G Essential x KBHR Medora G132

This exciting mating produced a group of bulls and females that are hard to fault. We purchased this flush opportunity from the Keller's in 2021 and it worked! The Medora cow has established herself as one of the best in the breed and needs no introduction. This group of females represent elite genetics to power up your program or build a program around. These are foundation females. **Retaining the right to one flush with a minimum of 8 transferable eggs and an open top.**
